

PIYUSH FUNDE

Nagpur, Maharashtra, India | +91-8459728228 | fundepiyush18@gmail.com | [linkedin.com/piyush-funde](https://www.linkedin.com/piyush-funde) | github.com/piyush-Funde

PROFILE SUMMARY

Backend-focused software developer who builds and ships REST APIs with Java, Spring Boot, and MySQL/PostgreSQL. Experience designing data models, implementing JWT-based authentication and role-based access, integrating Kafka for asynchronous processing, and debugging issues end-to-end from the database layer to the API response. Comfortable working directly with product and frontend engineers on API contracts, and participating in mentor-led code reviews.

SKILLS

Languages: Java (Proficient), Python (Intermediate), JavaScript (Intermediate)
Backend & APIs: Spring Boot, REST APIs, Flask, JWT-based authentication, Apache Kafka
Databases: MySQL, PostgreSQL, MongoDB — schema design and queries
DevOps & Tools: Git, GitHub, CI/CD, Docker, AWS

EXPERIENCE

Java Development Intern - Labmentix (Remote)

June 2026 - Present

- Built and debugged REST APIs end-to-end from database queries to API response in a Java Spring Boot backend, under mentor code review to keep implementations clean and production-ready.
- Implemented CloudDrive's authentication layer (JWT) along with file upload/download and role-based sharing endpoints in Java and Spring Boot.
- Refactored backend logic across CloudDrive and SmartERP to fix integration bugs, reducing recurring issues flagged in mentor code reviews and improving maintainability.

Software Engineering Virtual -JPMorgan Chase & Co. (Forage)

September 2025 - October 2025

- Built core components of the Midas transaction-processing system (Java, Spring Boot, Kafka, SQL/H2, REST APIs), including JPA-based persistence, balance updates, and a REST endpoint for user balances.
- Integrated Kafka for asynchronous transaction processing and connected an external Incentive API, working across both the data layer and the API layer of the same service.

PROJECTS

EVA CRM System ([Website](#)) | *React.js, Java, Spring Boot, MySQL, REST APIs, JWT, Apache POI, WebSockets*

- Designed and built Spring Boot REST APIs and the underlying MySQL data model for authentication, customer management, collection tracking, and real-time reporting for a live client (Eva Groups).
- Built an Excel-to-MySQL data ingestion pipeline (Apache POI) as a reliable backend workflow for daily customer records.
- Implemented JWT-based role-based access control (RBAC) to scope API access for admin and executive users.
- Added WebSocket-based real-time sync and offline handling for mobile clients, coordinating API contracts with the frontend.

Bedside Bot ([GitHub](#)) | *Python, Flask, OpenCV, Mediapipe, DeepFace*

- Built a Flask-based backend behind a gesture-, emotion-, and voice-driven hospital assistant for bedridden patients,
- Implemented real-time gesture recognition with 94% accuracy using Mediapipe and OpenCV, used DeepFace and SpeechRecognition python libraries in integrated Flask web application.

EDUCATION

MIT Art, Design & Technology University - B.Tech, Computer Science

Aug 2022 - June 2026

CGPA: 7.58 | Relevant Coursework: Data Structures, Object-Oriented Programming, Database Management Systems

S.H. Junior College, Khamla, Nagpur - HSC (Science) | Percentage: 75%

June 2020 – May 2021

ACHIEVEMENTS

- Smart India Hackathon 2024: Selected among Top 50 out of 564 entries at MIT-ADT University.
- IGNITE-2026 Research Paper Acceptance (Paper ID: 896) AI-powered healthcare assistant system, accepted for Oral Presentation.

CERTIFICATIONS

- AWS Cloud Quest - Cloud Practitioner-AWS | AWS Academy Cloud Foundations
- Computer Networking - Cisco Networking Academy | Java, Python & JavaScript - Spoken Tutorial Project, IIT Bombay
